

HR Attrition Analysis Dashboard

IBM HR Dataset		1,470 Employees		ML Accuracy: 83.3%
Total Employee	Employees Left	Attrition Rate	Avg Monthly Income	Total Employee
1K	237	16.12	6.50K	7.01

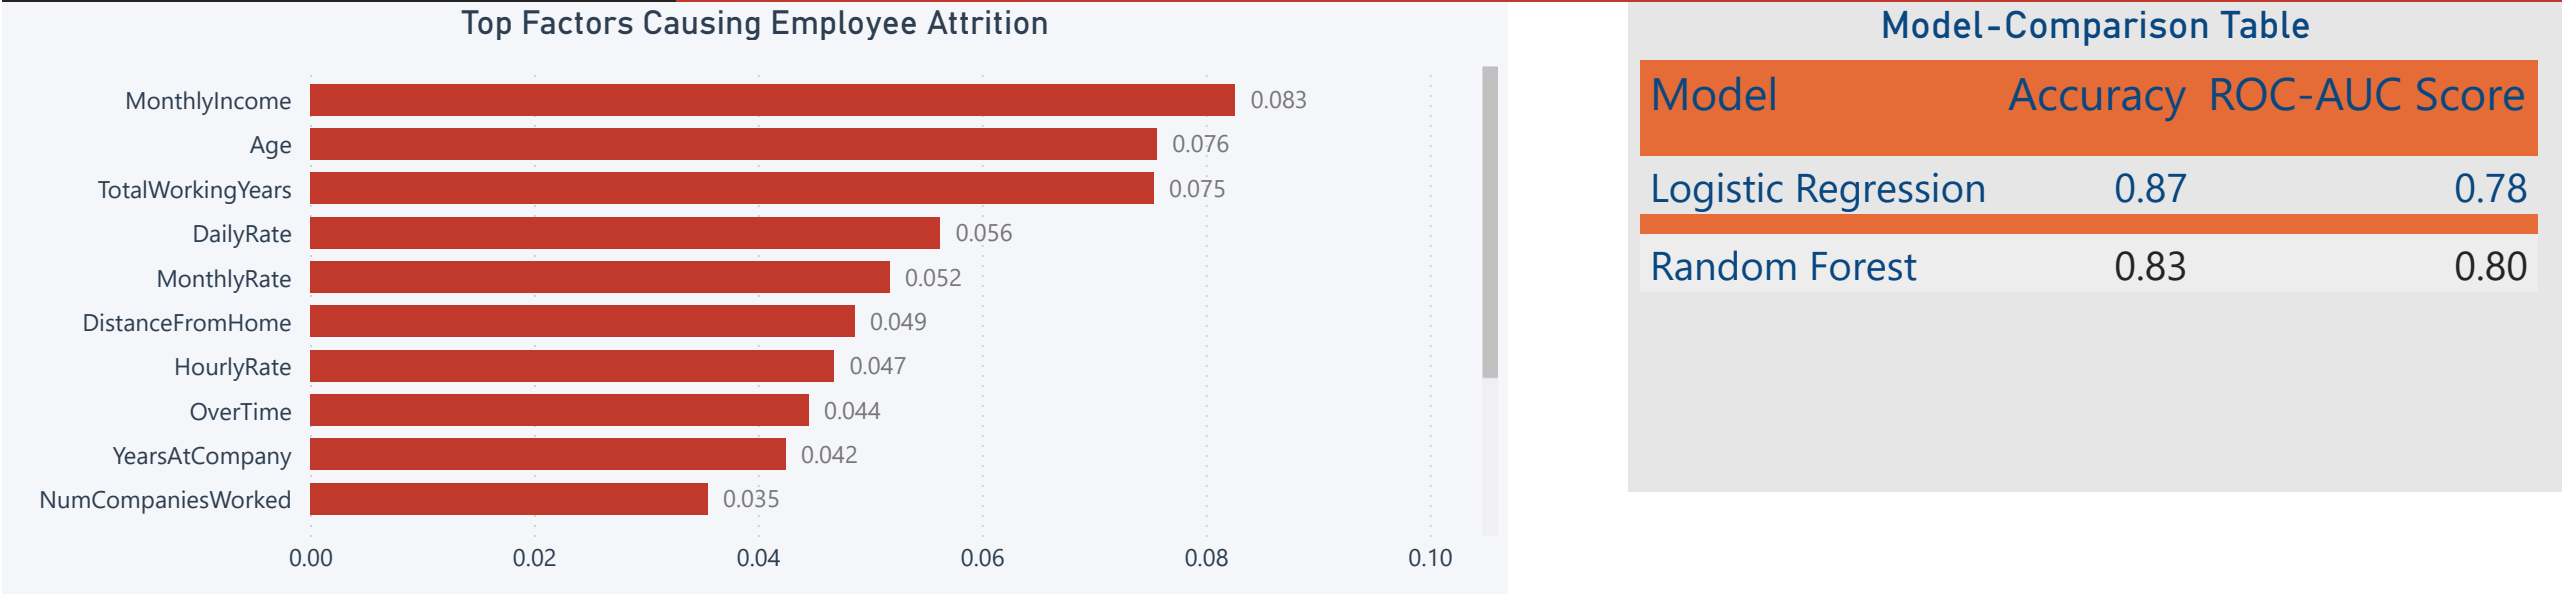

Machine Learning — Attrition Prediction Model

Algorithm	Training Data	Testing Data	Accuracy
Random Forest Classifier	1,176	294 Employees	83.3%

KEY HR RECOMMENDATIONS

- 1. Monthly Income is the #1 attrition factor → Salary revision for bottom 20% earners is top priority
- 2. Overtime employees are 3x more likely to leave → Cap overtime, hire additional staff immediately
- 3. Sales dept has highest attrition rate (40%+) → Introduce performance bonuses & career growth plans
- 4. Employees aged 18-25 leave most frequently → Better growth opportunities & mentorship needed
- 5. First 2 years are highest risk period → Stronger onboarding programs to improve retention
